The British discovered Shimla in the form of a little village in 1819 during the Anglo-Gorkha war. When war broke afresh in 1819, the British took the place with its cool and healthy climate. Here was installed a village of tents, where the heat weary British military and civil officers came to rest and the first house built in 1822, is regarded to be "Kennedy House" which was the residence of Charles Pratt Kennedy, the newly appointed political officer to the hill states. In 1864 under the Viceroyalty of John Lawrence, Shimla was officially declared the Summer Capital of British Empire in India (April to October). - a status is retained upto Indian Independence in 1947. After the independence of India, Shimla became the capital of Punjab until 1966, when it came under Himachal Pradesh. In 1971 Himachal Pradesh became a full fledged state and Shimla became the capital of this state.

It freezes in winter and people enjoy skating on this lake. Nako Lake is a pilgrim destination for the Buddhists. Because the Nako Lake is situated at such a great height, there are only a few species of fishes that populate the lake. Anglers coming here with their fishing rods come mainly to while away their time in the beautiful surroundings of the lake. One can observe numerous species of birds and flying overhead at Nako Lake. Tabo - the largest district in the northern state of Himachal Pradesh, **Lahaul and Spiti**, is a vast area of high mountains and low valleys. **It is bounded by Ladakh to the north, Tibet to the east, and the Kullu valley to the south.** The district is named after its two subdivisions, which are distinct and separate regions, despite of their topographical and cultural similarities. The altitude varies from over 6,500 m in the high peaks to 2,740 m, where the Chenab River makes its exit from the region. The Lahaul region is at an altitude of 3000-3900 m, the air is much rarified and there are heavy snowstorms between September and May. Nevertheless, since the rains here are very scanty, it is an ideal place for trekkers, especially in the months between June and September. The **Spiti valley** is connected to Lahaul through the 4500-meter **Kunzam pass**. Beyond the reach of the monsoon, the valley sees little rain in summer, when the sun is strong, and the nights cool. It is the seat one of the most famous Buddhist monasteries regarded next to the Tholong Gompa in Tibet. The monastery contains large number of scriptures and pieces of art, wall painting and Stucco. It is also known as Ajanta of Himalayas.

Tabo Monastery: It is situated at village Tabo at a height of 3050 meter lying in the Spiti valley near the Tibetan (Chinese) border just north of the Satluj River. It was built in A.D. 996 by **Ringchen Zangpo** and has been declared as the place where the current **Dalai Lama** will retire. Its sculptures, stucco images and wall paintings are similar to the Ajanta-Ellora paintings.
